

QUOTATION — SOFTWARE DEVELOPMENT & MAINTENANCE

# AI Marketing & Communication Platform

Complete Grexa-equivalent solution — custom-built for your business

**₹43,500** one-time development + 15 months maintenance

| QUOTATION NO. | DATE          | VALID UNTIL   | MAINTENANCE        |
|---------------|---------------|---------------|--------------------|
| QTN-2026-001  | 30 March 2026 | 30 April 2026 | 15 Months Included |

## 1 What You Get

We will build a **complete AI marketing platform custom-made for your business** — just like Grexa AI, but tailored to you. AI will chat with your customers on WhatsApp, capture leads, send reminders, and help you grow sales — all on autopilot, 24/7. **One-time development cost + 15 months of free maintenance.** WhatsApp API charges billed directly to you at Meta's actual rates — no markup.

### WhatsApp AI Agent

24/7 chatbot — handles multiple queries

### Lead Conversion AI

Missed call? AI follows up on WhatsApp

### CRM + Dashboard

Leads, analytics & revenue insights

### Marketing AI Agent

Campaigns, reminders & re-marketing

### Better Value Than Grexa AI

Grexa AI charges **₹15,000/quarter (₹60,000/year + GST = ₹70,800/year)** — and that's recurring every year. Our **₹43,500 one-time cost** gives you the same AI agents + **full customization, dedicated support, and 15 months of free maintenance** — saving ₹27,300+ compared to Grexa's first year alone.

## 2 Your AI Marketing Team — All 4 Agents Included

You get **4 AI assistants** that work for your business round-the-clock — just like having a full marketing team, but automated and affordable.

## Agent 1

 **WhatsApp Chat AI Agent**

**Your 24/7 Personal Assistant — Chats With Customers Round-the-Clock**

- ✓ Exclusively trained on your business
- ✓ Handles multiple queries in one conversation
- ✓ Remembers customer purchase history
- ✓ Multilingual — English, Hindi, Marathi + 9 more
- ✓ Handles unlimited conversations simultaneously
- ✓ Knows your services, pricing & testimonials
- ✓ Human-like, natural conversations
- ✓ Instant replies — no customer left waiting

## Agent 2

 **Lead Conversion AI Agent**

**Missed Call? AI Follows Up on WhatsApp — No Lead Lost, Ever**

- ✓ Customer calls from Google Business Profile — if you miss the call, AI instantly sends a WhatsApp message
- ✓ Caller's number auto-saved as a lead in your CRM
- ✓ Captures leads from WhatsApp, missed calls & walk-ins
- ✓ Shares brochures, product info & testimonials automatically
- ✓ "We're busy right now — ask your query here on WhatsApp!" — AI chatbot takes over the conversation
- ✓ Works with your existing phone number — no extra setup
- ✓ Auto follow-ups for unresponsive leads
- ✓ Lead performance tracking & conversion metrics

## Agent 3

 **Promotional Marketing AI Agent**

**Boosts Repeat Sales, Google Reviews & Customer Retention**

- ✓ Repeat purchase reminders
- ✓ Discount & promotional offer campaigns
- ✓ Pending payment reminders
- ✓ Membership renewal reminders
- ✓ Follow-up visit reminders
- ✓ Upselling & cross-selling campaigns
- ✓ Google review request automation
- ✓ Campaign analytics & conversion tracking

## Agent 4

 **AI CRM & Revenue Dashboard**

**Complete Business Intelligence — All Your Data in One Place**

- ✓ Revenue dashboard with insights on the go
  - ✓ Lead pipeline — new, contacted, converted
  - ✓ Communication history & chat logs
  - ✓ Multi-role staff access (Owner, Admin, Manager, Staff)
  - ✓ Customer purchase history & sales reports
  - ✓ Chat inbox (WhatsApp Web-style interface)
  - ✓ Invoice sharing via WhatsApp
  - ✓ Real-time notifications & live updates
-

3    **Head-to-Head — Us vs. Grexa AI**

| FEATURE                    | GREXA AI (₹70,800/YR WITH GST)  | OUR PLAN (₹43,500 ONE-TIME)                                              |
|----------------------------|---------------------------------|--------------------------------------------------------------------------|
| WhatsApp AI Chatbot (24/7) | ✔ Included                      | ✔ Custom-trained + multi-query handling                                  |
| Lead Conversion AI Agent   | ✔ Included                      | ✔ With missed call → WhatsApp AI follow-up                               |
| Missed Call → WhatsApp AI  | ✗ Not available                 | ✔ Customer calls from Google, misses → AI sends WhatsApp & captures lead |
| Promotional Marketing AI   | ✔ Template-based                | ✔ Custom campaigns + segmentation                                        |
| CRM + Revenue Dashboard    | ✔ Standard                      | ✔ Customized to your business                                            |
| Multilingual Support       | ✔ 12 languages                  | ✔ Unlimited (AI-powered)                                                 |
| Multi-Role Staff Access    | ✔ 4 roles                       | ✔ 4 roles (Owner, Admin, Manager, Staff)                                 |
| Google Business Profile AI | ✔ Included                      | 🕒 Available as add-on                                                    |
| Dedicated Support          | General support team            | ✔ Direct developer access                                                |
| Customization              | ✗ One-size-fits-all             | ✔ Tailored to your business                                              |
| Platform Lock-in           | ⚠ Tied to Grexa platform        | ✔ Your data, your control                                                |
| Plan Duration              | 12 months                       | <b>15 months maintenance included</b>                                    |
| Annual Price (incl. GST)   | <b>₹70,800/year (recurring)</b> | <b>₹43,500 (one-time)</b>                                                |

4    **Setup & Deployment Timeline**

We build your platform step by step. Your **WhatsApp AI chatbot goes live in just 2 weeks** — you start getting results right away while we build the rest.

| <b>WEEK 1-2</b><br>WhatsApp AI + Lead Capture<br><div><div></div> Go Live</div> |  | <b>WEEK 3-4</b><br>Lead Capture + CRM<br><b>Build</b>                                 | <b>WEEK 5-6</b><br>Dashboard + Analytics<br><b>Build</b> | <b>WEEK 7-8</b><br>Automation + Campaigns<br><div><div></div> Complete</div> |
|---------------------------------------------------------------------------------|--|---------------------------------------------------------------------------------------|----------------------------------------------------------|------------------------------------------------------------------------------|
| MILESTONE                                                                       |  | WHAT GETS DELIVERED                                                                   |                                                          | DURATION                                                                     |
| Setup                                                                           |  | We collect your business info (services, prices, FAQs) and set up accounts            |                                                          | 3-5 days                                                                     |
| Step 1 — WhatsApp AI                                                            |  | Your AI chatbot goes live on WhatsApp — starts talking to customers & capturing leads |                                                          | 10-12 days                                                                   |
| Step 2 — Lead Capture + CRM                                                     |  | Lead capture system, missed call auto-reply on WhatsApp, CRM & pipeline setup         |                                                          | 10-12 days                                                                   |
| Step 3 — Dashboard                                                              |  | Your business dashboard — revenue, chats, reports, everything at a glance             |                                                          | 10-12 days                                                                   |
| Step 4 — Automation                                                             |  | Auto follow-ups, promotional campaigns, review reminders — all on autopilot           |                                                          | 8-10 days                                                                    |
| Total Setup Time                                                                |  |                                                                                       |                                                          | ~6-8 Weeks                                                                   |

\* Your WhatsApp AI goes live in Week 2 itself — you don't have to wait for everything to be ready. The setup period does not count toward your 15-month maintenance period.

## 5 Pricing & Plan Details

What You Pay Directly to Third Parties (Not to Us)

| RUNNING COST          | DETAILS                                                                                                          | WHO CHARGES     |
|-----------------------|------------------------------------------------------------------------------------------------------------------|-----------------|
| WhatsApp Business API | Per-conversation charges at Meta's official rates — see Section 6 for full breakdown (100 to 10,000 daily users) | META / WHATSAPP |
| AI / GPT Processing   | AI token usage for chatbot conversations — charged at actual OpenAI rates with no markup                         | OPENAI          |

| RUNNING COST         | DETAILS                                                           | WHO CHARGES |
|----------------------|-------------------------------------------------------------------|-------------|
| ₹500 WhatsApp Credit | Free messaging credit included to get you started (same as Grexa) | ₹500 FREE   |

✦ **About Running Costs (WhatsApp + GPT)**

WhatsApp & GPT charges are **not our fees** — they go directly to Meta (WhatsApp) and OpenAI (GPT). Every WhatsApp business platform — including Grexa — has these same running costs. We don't add any markup or commission. **See Section 6 below for a detailed cost calculator at every business scale (100 to 10,000 daily users).**

## 6 WhatsApp Business API — Your Running Costs

WhatsApp charges businesses per **conversation** (not per message). Each conversation opens a **24-hour window** — you can send unlimited messages within that window at no extra cost. Here's exactly how it works and what it costs:

### WhatsApp Conversation Rates (India)

| CONVERSATION TYPE | WHO STARTS IT              | RATE PER CONVERSATION | WHEN IT'S USED                          |
|-------------------|----------------------------|-----------------------|-----------------------------------------|
| Service           | Customer messages you      | FREE ✓                | AI chatbot replies to customer queries  |
| Marketing         | You message customer first | ₹0.77                 | Promotions, offers, campaign blasts     |
| Utility           | You message customer first | ₹0.34                 | Reminders, order updates, confirmations |
| Authentication    | You message customer first | ₹0.14                 | OTPs, verification codes                |

#### ✓ Good News: Your AI Chatbot Conversations Are FREE

When a customer messages your WhatsApp number and the AI chatbot replies — that's a **Service conversation = completely FREE**. You only pay when YOUR business sends the first message (campaigns, promotions, reminders). This means **your AI chatbot can handle thousands of customer queries daily at zero WhatsApp cost**.

### Monthly Cost Estimate — 100 to 10,000 Daily Users

**Assumptions:** AI chatbot handles all incoming customer chats (FREE). Business sends 4 promotional campaigns/month to full customer list. Utility reminders sent to ~10% of daily users. AI processing via GPT-4o-mini at actual token rates.

| DAILY USERS | AI CHATBOT (FREE) | 4 CAMPAIGNS (₹0.77 EA) | REMINDERS (₹0.34 EA) | AI PROCESSING | TOTAL / MONTH |
|-------------|-------------------|------------------------|----------------------|---------------|---------------|
| 100         | 3,000 chats — ₹0  | 400 msgs — ₹308        | 300 msgs — ₹102      | ~₹200         | ~₹610/mo      |
| 250         | 7,500 chats — ₹0  | 1,000 msgs — ₹770      | 750 msgs — ₹255      | ~₹500         | ~₹1,525/mo    |

| DAILY<br>USERS | AI<br>CHATBOT<br>(FREE) | 4 CAMPAIGNS<br>(₹0.77 EA) | REMINDERS<br>(₹0.34 EA)  | AI<br>PROCESSING | TOTAL /<br>MONTH |
|----------------|-------------------------|---------------------------|--------------------------|------------------|------------------|
| 500            | 15,000<br>chats — ₹0    | 2,000 msgs —<br>₹1,540    | 1,500 msgs —<br>₹510     | ~₹1,000          | ~₹3,050/mo       |
| 1,000          | 30,000<br>chats — ₹0    | 4,000 msgs —<br>₹3,080    | 3,000 msgs —<br>₹1,020   | ~₹2,000          | ~₹6,100/mo       |
| 2,500          | 75,000<br>chats — ₹0    | 10,000 msgs —<br>₹7,700   | 7,500 msgs —<br>₹2,550   | ~₹5,000          | ~₹15,250/mo      |
| 5,000          | 1,50,000<br>chats — ₹0  | 20,000 msgs —<br>₹15,400  | 15,000 msgs<br>— ₹5,100  | ~₹10,000         | ~₹30,500/mo      |
| 10,000         | 3,00,000<br>chats — ₹0  | 40,000 msgs —<br>₹30,800  | 30,000 msgs<br>— ₹10,200 | ~₹20,000         | ~₹61,000/mo      |

✦ Important Notes

- **Most small-medium businesses** fall in the 100–500 daily users range = just **₹610–₹3,050/month**.
- **Campaigns are optional** — if you send fewer, your costs drop significantly. Without any campaigns, only AI processing applies (~₹200–₹2,000/month).
- **These costs are the same on Grexa** — all WhatsApp platforms charge these rates. We don't add any markup.
- AI processing costs decrease over time as AI models get cheaper.

📄 Yearly Running Cost Summary

| DAILY<br>USERS | MONTHLY<br>COST | YEARLY COST (API<br>ONLY) | GREXA TOTAL (₹70,800 + SAME<br>API) |
|----------------|-----------------|---------------------------|-------------------------------------|
| 100            | ~₹610           | ~₹7,320/yr                | ₹70,800 + ₹7,320 = ₹78,120/yr       |
| 500            | ~₹3,050         | ~₹36,600/yr               | ₹70,800 + ₹36,600 = ₹1,07,400/yr    |
| 1,000          | ~₹6,100         | ~₹73,200/yr               | ₹70,800 + ₹73,200 = ₹1,44,000/yr    |
| 5,000          | ~₹30,500        | ~₹3,66,000/yr             | ₹70,800 + ₹3,66,000 = ₹4,36,800/yr  |
| 10,000         | ~₹61,000        | ~₹7,32,000/yr             | ₹70,800 + ₹7,32,000 = ₹8,02,800/yr  |

💰 The Real Comparison With Grexa

Grexa charges ₹70,800/year **PLUS** the same WhatsApp & AI running costs. With our platform, you pay **₹43,500 once** (development + 15 months maintenance) — then only running costs going forward. **In the first 15 months alone, you save ₹70,800+ compared to Grexa.**

## 7 How It Works — Simple & Reliable

Your entire platform runs on **Appwrite** — a secure, enterprise-grade cloud backend. It handles user accounts, data storage, real-time updates, and all the automation logic. No complicated setup, no multiple servers to manage.

### Appwrite Cloud

Your entire backend — data, security, automation, real-time updates

### WhatsApp Business

Official Meta API for messaging your customers

### AI (ChatGPT-level)

Powers the smart chatbot & marketing automation

### Why Appwrite?

Appwrite is a trusted cloud platform used by thousands of businesses worldwide. It keeps all your customer data **secure and private**, provides **real-time updates** (you see new leads instantly), and handles everything from login security to database storage — all in one place.

## 8 Payment Structure

| PAYMENT         | AMOUNT  | WHEN                                            |
|-----------------|---------|-------------------------------------------------|
| 50% Advance     | ₹21,750 | At project kickoff — before setup begins        |
| 50% On Delivery | ₹21,750 | After full platform deployment & handover       |
| TOTAL           | ₹43,500 | Development + 15 months maintenance (incl. GST) |

\* No hidden charges. ₹43,500 is the complete development + maintenance price. Running costs (WhatsApp API + AI processing) are billed separately at actual Meta/AI provider rates as detailed in Section 6. We don't add any markup.

9 After 15 Months — Maintenance & Renewal

After your 15-month free maintenance period ends, your platform **keeps working as-is**. You can choose a maintenance plan for continued support, updates, and fixes — or manage independently. Here are the options:

| MAINTENANCE PLAN                                                                                         | MONTHLY   | YEARLY (SAVE ~17%) | WHAT'S INCLUDED                                                                    |
|----------------------------------------------------------------------------------------------------------|-----------|--------------------|------------------------------------------------------------------------------------|
|  Basic                  | ₹1,250/mo | ₹15,000/yr         | Bug fixes, Appwrite hosting, server monitoring, minor updates, email support       |
|  Standard (Recommended) | ₹1,700/mo | ₹20,000/yr         | Everything in Basic + feature updates, AI retraining (quarterly), priority support |

 What maintenance covers (paid to us)

Maintenance covers **Appwrite hosting, bug fixes, monitoring, updates & support** — everything to keep your platform running smoothly. WhatsApp API & GPT running costs remain separate and are paid by you directly to Meta/OpenAI (same as during the first 15 months).

 Total Yearly Cost After 15 Months (Maintenance + Running Costs)

| BUSINESS SCALE  | API COSTS (CLIENT PAYS) | + BASIC MAINT. (₹15K/YR) | + STANDARD MAINT. (₹20K/YR) | GREXA ANNUAL |
|-----------------|-------------------------|--------------------------|-----------------------------|--------------|
| 100 users/day   | ~₹7,320                 | ₹22,320/yr               | ₹27,320/yr                  | ₹78,120/yr   |
| 500 users/day   | ~₹36,600                | ₹51,600/yr               | ₹56,600/yr                  | ₹1,07,400/yr |
| 1,000 users/day | ~₹73,200                | ₹88,200/yr               | ₹93,200/yr                  | ₹1,44,000/yr |

 Still Cheaper Than Grexa — Even After 15 Months

Even with our Standard maintenance plan (₹20,000/yr), your total annual cost stays **significantly lower than Grexa at every business scale**. For a typical small business (100–500 daily users), you

save **₹50,000–₹55,000/year** compared to Grexa — every year, forever. The minimum you'd pay us after 15 months is just **₹15,000–₹20,000/year** for maintenance.

## 10 Terms & Conditions

- **₹43,500 is the total development cost** — includes building, deployment, and 15 months of free maintenance after delivery.
- **15 months maintenance starts after delivery** — your free maintenance period begins only after the platform is fully deployed and handed over to you.
- **Setup time (~6–8 weeks)** is for building the platform — it does not count toward the 15-month maintenance period.
- **WhatsApp & AI running costs are on the client** — these are third-party charges (WhatsApp/Meta & AI provider) at actual rates with no markup. See Section 6.
- **We handle all fixes for 15 months** — if anything breaks, we fix it. Updates and monitoring included throughout.
- **Your data is yours** — all leads, chats, and customer info belongs to you, always.
- **Your WhatsApp number** — set up under your name. You own it completely.
- **After 15 months** — platform keeps working. Choose a maintenance plan (₹15,000–₹20,000/year — see Section 9) for continued support, or manage independently.
- **No lock-in** — no hidden penalties. You only pay what's agreed.
- **100% confidential** — your business data and customer info is never shared with anyone.
- **₹43,500 = final development price** — GST already included. No surprises.

## 11 What's Not Included (Optional Add-Ons)

| ITEM                             | STATUS | NOTES                                                           |
|----------------------------------|--------|-----------------------------------------------------------------|
| Google Business Profile (GBP) AI | ADD-ON | Auto Google posts, SEO keywords, review replies — can add later |

| ITEM                                                                                                  | STATUS | NOTES                                                         |
|-------------------------------------------------------------------------------------------------------|--------|---------------------------------------------------------------|
